

Nebraska Soybean & Feed Grains Profitability Project

Years: 2008
Title: Using Foliar Fungicide
Crop: Soybeans
NSFGPP Operator: Bryon Chvatal, Saunders County
Private Industry Cooperator: Nathan Cernik
Objective: To determine & document the effect of using a fungicide spray on the profitability of producing soybeans.
Treatments: Strips were sprayed with Stratego on 8-17-08.

Nebraska Soybean & Feed Grains Profitability Project

Results: 2008 (NC+ 3A32RR)

<u>Variable</u>	<u>Check</u>	<u>Stratego</u>	<u>Prob >/T/</u>
Yield, bu/ac @ 13%	47	49	0.241 ns
Moisture, %	9.6	9.6	1.000 ns
Cost/ac	---	\$12.10	

Planting Date: 5/15/08

Harvesting Date: 10/10/08

Summary: The application of fungicide had no effect on the yield of soybeans in 2008.
 Hailed on June 27 with 30-40% damage.
