

Years: 2005

Title: Strip-till Crop Production

Crop: Dryland Corn

NSFGPP Operator: ARDC

Private Industry Cooperator:

Objective: Determine and document the effect of strip tillage on the profitability of crop production.

Treatment: No-till vs. strip-till (spring operation)

Results: 2005

	<u>No-till</u>	<u>Strip-till</u>	<u>Prob>T/</u>
Non-Irr., Corn, bu/ac at 15.5'	131	135	0.1293 ns
Cost/ac		\$5.75	

Summary: Strip-tillage did not increase the grain yield of non-irrigated corn.
